

一、选择题

1、 Programs that coordinate computer resources, provide an interface, and run applications are known as ().

 B (2分)

- ☐ A: application programs
- ☒ B: operating systems
- ☐ C: storage systems
- ☐ D: utility programs

2、 System software includes all of the following except().

 D (2分)

- ☐ A: Operating systems
- ☐ B: Device drivers
- ☐ C: Utilities
- ☒ D: Browsers

3、 () do not use streaming technology and are used to download media files to your computer.

 B (2分)

- ☐ A: Webcasts
- ☒ B: Podcasts
- ☐ C: Micro blogs
- ☐ D: Twitter

4、 Parents can use () to block access to selected Websites.

 D (2分)

- ☐ A: plug-in
- ☐ B: FTP
- ☐ C: bit torrents
- ☒ D: filter

5、 () are used to create and edit vector images.

 A (2分)

- ☒ A: Illustration programs
- ☐ B: Photo editors
- ☐ C: Presentation graphics
- ☐ D: Image galleries

6、 The () can contain a document, program, or message.

 D (2分)

- ☐ A: dialog box
- ☐ B: form
- ☐ C: frame
- ☒ D: windows

7、 When a file is broken up into small parts that are stored wherever space is available, the hard disk is said to become ().

 C (2分)

- ☐ A: contiguous
- ☐ B: sector
- ☒ C: fragmented
- ☐ D: disbursed

8、 Frequently-accessed information is held in ().

 D (2分)

- ☐ A: hard drive
- ☐ B: flash memory
- ☐ C: ROM
- ☒ D: cache memory

9、 The study of human factors related to things people use.

 B (2分)

- ☐ A: Headgear
- ☒ B: Ergonomics
- ☐ C: Technical study
- ☐ D: RSI

10、 () allows a computer to run two or more operations simultaneously?

 C (2分)

- ☐ A: Coprocessors
- ☐ B: Multiplexing
- ☒ C: Multicore chip
- ☐ D: Binary system

11、 OMR, OCR, and MICR are all types of ().

 D (2分)

- ☐ A: Radio Frequency Card Readers
- ☐ B: magnetic card readers
- ☐ C: bar code readers
- ☒ D: character and mark recognition devices

12、 The distance between each pixel is called ().

 A (2分)

- ☒ A: dot pitch
- ☐ B: refresh rate
- ☐ C: resolution
- ☐ D: word size

13、 Which of these is not a mass storage device? ()

 C (2分)

- ☐ A: RAID system
- ☐ B: File server
- ☒ C: Optical disc
- ☐ D: cloud storage

14、 Which among the following is considered a line-of-sight communication medium?

 D (2分)

- ☐ A: Broadcast radio
- ☐ B: Satellite
- ☐ C: Bluetooth
- ☒ D: Microwave

15、 Every computer on the Internet has a unique numeric address called a(n) ().

 C (2分)

- ☐ A: domain address
- ☐ B: protocol address
- ☒ C: IP address
- ☐ D: Web address

16、 What managerial level has information flow that is vertical, horizontal, and external?

 A (2分)

- ☒ A: top
- ☐ B: supervisory
- ☐ C: middle
- ☐ D: foreman

17、 The three primary privacy issues are accuracy, property, and ().

 A (2分)

- ☒ A: access
- ☐ B: security
- ☐ C: ownership
- ☐ D: moral

18、Computer criminals who create and distribute malicious programs.

_____ B _____ (2分)

- ☐ A: antispies
- ☒ B: crackers
- ☐ C: cyber traders
- ☐ D: identity thieves

19、What type of report is produced at regular intervals?

_____ D _____ (2分)

- ☐ A: Demand
- ☐ B: exception
- ☐ C: inventory
- ☒ D: periodic

20、Each record in a database has at least one distinctive field, called the ().

_____ A _____ (2分)

- ☒ A: key field
- ☐ B: structure
- ☐ C: type
- ☐ D: view

二、填空题

1、 There are four types of computers: supercomputer, _____ computer, midrange computer, and personal computer.

2、 In the URL "http://www.simnetonline.com", "www.simnetonline.com" is the _____ name.

(1分)

3、 _____ images are made up of geometric shapes or objects.

(1分)

4、 Disk Cleanup, File History, and Disk Defragmenter are all examples of _____ programs.

(1分)

5、 The most widely used character encoding standard today is _____.

6、 _____ printers use a technology similar to that used in a photocopy machine.

(1分)

7、 The _____ of a secondary storage device indicates how much data the storage medium can hold.

(1分)

8、 The capacity of a communication channel is measured in _____.

(1分)

9、 _____ is the code of conduct.

(1分)

10、 A DSS consists of four parts: user, system software, decision models, and _____.

(1分)

三、匹配题

1、

a. server
b. Virtualization
c. spam
d. Contrast
e. Duplex
f. middle
g. accuracy
h. System unit
i. Radio waves
j. Virtual

___1. Unsolicited e-mail is called ().
___2. () of printer features enables you to print on both sides of a sheet of paper.
___3. Cloud suites are stored at at(n) () on the Internet, rather than on your microcomputer.
___4. Privacy concern that relates to the responsibility to ensure correct data collection.
___5. A container that houses most of the electronic components that make up a computer system.
___6. () memory uses the hard drive to substitute for RAM.
___7. Microwave communication uses high-frequency ().
___8. Managerial level where information flow is vertical and horizontal.
___9. () refers to the process whereby a single physical computer can support multiple operating systems.
___10. () ratio indicates a monitor's ability to display colors by comparing the light intensity of

四、英译汉

1、 近日，中国电信发布了业内首款基于量子信息技术的VoLTE加密通话产品——天翼量子高清密话。天翼量子高清密话搭载中国电信定制终端，采用国产芯片的量子安全SIM卡，自主研发量子安全中间件，在手机侧完成对VoLTE语音数据的加解密，有效防止通话在网络传播中被监听。与此同时，天翼量子高清密话采用国产定制手机、量子安全SIM卡和国密算法“三重保护”，在保障终端原生支持、VoLTE高清通话基础上，为用户提供一体化安全防护。拥有了该产品，用户每次发起“量子密话”都会随机抽取卡内密钥校验用户身份，认证通过后再由量子网络实时生成一个新密钥加密会话数据。密钥真随机、难破译，会话结束后密钥立刻被废弃。

(10分)

2、 你有没有注意到外界有多少信息，从图书馆里的书和期刊到网上数百万篇文章？你有没有想过，专业人士是如何读完所有的研究，以便在他们的领域保持最新的？最近，随着信息量的增加，这些专业人士发现很难跟上信息的增长。在未来，IBM希望通过其名为“沃森”的信息查找超级计算机来改变这一现状。技术已经成为更好的信息工具，并将继续发展，以改善我们的生活，因为我们展望未来。

五、汉译英

- 1、 Sharing personal information on social media is a necessary part of creating and participating in an online community. However, many individuals do not fully understand the complex sharing and privacy policies of these networks. This often causes unintentional sharing with people outside their intended social circle. The social networks themselves have come under fire from privacy groups, who say that these companies use complex settings and policies to get users to share more information than intended. This information is in turn shared with advertisers. Do you think social networking companies are doing enough to ensure the privacy and security of the communities they serve?

(10分)

- 2、 Telepresence is the use of technology to create the illusion that you are actually somewhere else. Unlike a video conference, where a small screen conveys the images and sounds of another location, telepresence attempts to replicate the foreign location entirely. These technologies include improved video and audio with immersive screens and multiple directional speakers. But it goes further than that. Telepresence will allow you to touch things in this other location—to interact with the world there through robotics and even feel this other location. In the future, telepresence will likely include robots that will allow you to walk the halls of your office or other remote locations from the comfort of your home. Technology will continue to evolve to improve our lives as we look to the future.
